

PROFESSOR MOHAMMAD HOSSEIN HAKIMI MEIBODY

Mohammad Hossein Hakimi Meibody was born in 1963 in Meibod, Yazd province. He had gotten his diploma in Meibod and then for higher education, he had gone to Isfahan university and had exceeded direction of plant science for 4 years and graduated in 1989 with excellent grade. Then, he went to Tehran university and passed course of Plant Systematic in Biology department of faculty of science since 1996 with excellent grades; in this year (1996), he was accepted as a faculty member of Natural Resources department of Yazd University. He trained many students at Yazd University since 2003. Then, he has gotent a scholarship from Mministry of Science Research and Technology in 2003 and has gone to Puna University of India and completed his higher education in Mycology up to PhD degree.

In coming back to Iran, he has been selected as chairman of Natural Resources faculty of Ardakan city in 2004. Then, he has published some bulletins and 3 books about Range Plants and many research programs were presented by him during 2004 to 2017. He supervised many Msc students and also published 30 articles in scientific journals.

He loved nature and spent a lot of time visiting and sampling range plants with complete herbarium of Natural Resources faculty of Yazd and Ardakan University. He died in December 2017 and it was very sorrowful for all of his colleagues and students.

God Bless Him.
