ABSTRACT

Background & Aim: The major teeth problems associated with adults are: Plaque, Tartar, Tooth decay, Gingivitis, Periodontal disease. There is a long and venerable history of the use of plants to improve dental health and promote oral hygiene. There are a number of traditional herbal remedies for the treatment and management of diseases related to teeth, gum and oral hygiene. Good oral hygiene is necessary for the healthy teeth, gum and fresh breath. This review explains the pharmacological potential of medicinal plants used for the treatment of various dental problems.

Experimental & Results: A number of formulation and method are used in oral hygiene to prevent and cure oral diseases. But now day's number of medicinal plants plays an important role in oral hygiene.

Recommended applications/industries: This review provides recently available knowledge of plants and their part for dental science in the treatment of various disease of oral cavity.

1. Introduction

The oral cavity contains the teeth used for mastication, the gum surrounded by periodontium and alveolar bone, the root of the mouth is known as the hard plate and posterior to it is the soft plate. These and other inner tissues of the cheeks are lined with oral mucous. The tongue is a mobile muscular organ contained in the mouth, it is concerned with speech, mastication, swallowing and taste because taste buds are

present on it, the lips preventing contents in the mouth from falling out of the mouth. Since the oral cavity plays these roles with the various parts inside it, it becomes of importance to take the best care of it using the effective methods, materials and making the best use of the resources that are available for oral hygiene (Cawson, 1984a; Cawson, 1984b).

The major teeth problems associated with adults are: Plaque, Tartar, Tooth decay, Gingivitis, Periodontal disease (Muhammad and Lawal, 2010). Periodontal

diseases affect the tissues surrounding the teeth. Gums and bone supporting the teeth come under the term periodontal. Gingivitis, the mildest form of periodontal disease, is generally caused by insufficient oral hygiene. Inadequate oral hygiene can lead to plaque buildup. A variety of triggering factors like bacterial causes, dyscrasias, avitaminosis etc. cause inflamed gums leading to gingivitis. Salivary tartar has an additive effect to these causative factors in causing gingivitis (Kumar et al., 2009). Plaque-induced gingivitis is one of the most frequent periodontal diseases, affecting more than 90% of the population, regardless of age, sex or race. However, the inability of the normal adult population to perform adequate tooth brushing has led to the search for chemotherapeutic agents in order to improve plaque control⁵. These chemicals, mainly Triclosan and chlorhexidine, have been used as mouth rinses or added to dentifrices to avoid plaque formation and development of gingivitis (Nogueira-Filho et al., 2000; Moran et al., 2001; Palomo et al., 1994; Yates et al., 1993). As some of these substances may have undesirable side effects, such as tooth staining and taste alteration, phytotherapeutic agents with antimicrobial and anti-inflammatory properties have been investigated (Lee et al., 2004; Salgado et al., 2006; Sastravaha et al., 2005).

There is a long and venerable history of the use of plants to improve dental health and promote oral hygiene (Lewis and Elvin-Lewis, 1977). There are many natural ways to treat dental disease some of which even help in preventing it from occurring. There are a number of herbs that can help eliminate inflammation and infection associated with dental diseases. A Saudi Arabian study compared the effect of miswak or tooth brushing on plaque removal and dental health using a single blind, randomized, crossover design (Al-Otaibi et al., 2003).

Proper oral hygiene, of course, goes a long way in treating and preventing dental problems. Tooth brushing with toothpaste is the most widely practiced form of oral hygiene in most countries (Pannuti et al., 2003). Twice daily brushing has significantly declined dental caries. Dental plaque is a bio-film on the tooth surface that plays an important role in the development of caries and periodontal diseases (Moran et al., 1988). While the mechanical removal of plaque on caries per se is equivocal, the maintenance of an effective plaque control program is the cornerstone of any attempt to prevent and control periodontal diseases (Jenkins et al., 1990). A wide range of chemicals, mainly antimicrobial agents, have been added to toothpastes in order to produce a direct inhibitory effect on plaque formation (Pannuti et al., 2003; Fine et al., 2006). The list of plants used in various dental problems are listed in table 1.

2. Results

Table 1. List of plant used in various dental problems

Sr. No	Plant name (Common name)	Family	Uses	Part used	Reference
1.	<i>Abuta grandifolia</i> (Mart.) Sandwith (Abota)	Menispermaceae	Toothache	Leaves, bark, Stems & roots	Gupta, 2006
2.	<i>Acacia modesta</i> Wall. (India phulai)	Mimosaceae	To clean teeth	Twig & Stem	Mahmood et al., 2005; Ahmad et al., 2009
3.	<i>Acacia nilotica</i> (L.) Delile (Egyptian Acacia)	Mimosoideae	Swollen gum (gingiviti)	Bark	Shekhawat and Batra, 2006
4.	<i>Acalypha indica</i> L. (Indian copperleaf)	Euphorbiaceae	Toothache	Whole plant	Siddamalla yya, 2010
5.	<i>Achyranthes aspera</i> L. (Devil's horsewhip)	Amaranthaceae	Toothache	Leaves and roots	Mahmood et al., 2005; Ahmad et al., 2009
6.	<i>Adansonia digitata</i> L. (Baobab)	Bombacaceae	Toothache	Bark	Dweck, 1996; Burkhill, 1985
7.	<i>Alchornea cordifolia</i> Mull.Arg (Lporuru)	Euphorbiaceae	Toothache	Whole plant	Zapfack, 2001; Kayode and Omotoynibio, 2009
8.	<i>Allium sativum</i> L. (Ajo)	Liliaceae	Toothache	Bulb	Gupta, 2006
9.	<i>Aloe ferox</i> Mill. (Aloe)	Liliaceae	Toothache	Leaves	Gupta, 2006
10.	<i>Aloe vera</i> (L.) Burm.f. (Indian Aloe)	Asphodelaceae	Gingivitis & plaque	Whole plant	De Oliveira et al., 2008
11.	<i>Anacardium occidentale</i> L.	Anacardiaceae	Toothache, Sore gum	Whole plant	Kayode and Omotoynibio, 2009

	(<i>Acajuba occidentalis</i>)						23.	<i>Capparis spinosa</i> L.	Cappar aceae	Tootha che	Root bark	Ahmad, 2007
12.	<i>Annona senegalensis</i> Pers. (Wild custard apple)	Annonaceae	Toothache	Bark	Mabogo, 1990		24.	<i>Cassia occidentalis</i> L. (Fedegoso)	Legum inosae	Toothache	Leaves	Agbovie et al., 2002
13.	<i>Argemone mexicana</i> Linn. (Mexican poppy)	Papaveraceae	Toothache and carriage	Seeds	Sikdar and Dutt, 2008		25.	<i>Cinnamomum camphora</i> L. (Camphor tree)	Lauraceae	Toothache, Teeth swelling	Leaves and branch es	Gupta, 2006, Ahmad et al., 2009
14.	<i>Aristolochia Guentheri</i> O.C. Schmidt (Zaragosa)	Aristolochiaceae	Toothache	Stem	Gupta, 2006		26.	<i>Circuma longa</i> Linn. (Turmeric)	Zingiberaceae	Toothache, Gingivitis	Rhizomes	Chaturvedi, 2009
15.	<i>Azadirachta indica</i> A. Juss. (Neem)	Meliaceae	Toothache	Whole plant	Siddamalla yya, 2010; Albandar et al., 1997		27.	<i>Cleome chelidonii</i> Linn.f. (Perunaika duku)	Cleomaceae	Gingivitis	Whole plant	Ganesan, 2008
16.	<i>Baptisia australis</i> (L.)R. Br. (Blue Wild Indigo)	Fabaceae	Toothache	Root	Indiana Medical History Museum, 2010		28.	<i>Clitoria ternatea</i> L. (Butterfly pea)	Fabaceae	Toothache	Roots	Siddamalla yya, 2010
17.	<i>Blighia sapida</i> K.D.Koenig (Akee)	Sapindaceae	Mouth rashes	Whole plant	Kayode and Omotoynib o, 2009		29.	<i>Cocos nucifera</i> Linn. (Coconut palm)	Arecaceae	Toothache	Fruits	Dweck, 1996; Spoerke, 1990
18.	<i>Borassus flabellifer</i> Linn. (Panai)	Arecaceae	Toothache	Root, Young Rachis	Ganesan, 2008		30.	<i>Cornus florida</i> L. (Dogwood tree)	Cornaceae	To clean teeth	Stem	Indiana Medical History Museum, 2010
19.	<i>Bridelia ferruginea</i> Benth. (Kizni)	Euphorbiaceae	Mouth rashes	Whole plant	Kayode and Omotoynib o, 2009		31.	<i>Croton Menthoides</i> Benth. (Chala)	Euphorbiaceae	Toothache	Seeds, leaves	Gupta, 2006
20.	<i>Brugmansia aurea</i> Lagerheim (Floripondio)	Solanaceae	Toothache	Flowers	Gupta, 2006		32.	<i>Datura stramonium</i> Linn. (Dhatura)	Solanaceae	Toothache	Roots	Sikdar and Dutt, 2008
21.	<i>Cajanus cajan</i> (Linn.) Millsp. (Thuvarai)	Fabaceae	Gingivitis	Leaves, stem, seeds	Ganesan, 2008		33.	<i>Dialium guineense</i> Wild. (Velvet tamarind)	Leguminosae	Toothache	Root	Agbovie et al., 2002
22.	<i>Calotropis gigantea</i> (L.) R.Br. (Akon)	Asclepiadaceae	Toothache	Roots	Sikdar and Dutt, 2008		34.	<i>Ekebergia senegalensis</i> A Juss. (Cape ash)	Meliaceae	Toothache	Leaves	Agbovie et al., 2002
							35.	<i>Eruca sativa</i> Miller (Rocket)	Cruciferae	Toothache	Leaves	Ahmad, 2007
							36.	<i>Erythrina lysistemon</i> Hutch.	Fabaceae	Toothache	Bark	Mabogo, 1990

	(Coral tree)										
37.	<i>Eucalyptus globulus</i> Labill. (Blue Gum)	Myrtaceae	Gum bleeding	Whole plant	Reddy et al., 2010; Nagata et al., 2008; Pack, 1984	49.	<i>Jatropha curcas</i> Linn. (Arandi)	Euphorbiaceae	Pyorrhoea	Fruit	Kayode and Omotoynibio, 2009
38.	<i>Euclea divinorum</i> Hiern (Magic gwarra)	Ebenaceae	Toothache	Bark, Leaves	Hutchings, 1996	50.	<i>Juglans regia</i> Linn. (Akhrot)	Juglandaceae	To clean teeth	Bark	Shekhawat and Batra, 2006
39.	<i>Euclea natalensis</i> A.DC. (Large-leaved guarri)	Ebenaceae	Toothache	Leaves	Mabogo, 1990	51.	<i>Justicia adhatoda</i> L. (Malabar Nut)	Acanthaceae	Pyorrhoea	Leaves	Ahmad et al., 2009
40.	<i>Euclea pseudebenus</i> E. Meyer ex A.DC. (Black ebony)	Ebenaceae	To clean teeth	Root	Damme, 1922	52.	<i>Kleinia longiflora</i> DC (Sambokbosse)	Asteraceae	Toothache	Stem	Damme, 1922
41.	<i>Fagonia cretica</i> L. (Cretan prickly clover)	Zygophyllaceae	Toothache	Whole plant	Ahmad, 2007	53.	<i>Licopersicon esculentum</i> Mill. (Tamater)	Solanaceae	Mouth rashes	Fruit	Shekhawat and Batra, 2006
42.	<i>Ferula assafoetida</i> Linn. (Heeng)	Apeaceae	Dental carries	Gum resin	Shekhawat and Batra, 2006	54.	<i>Lophira alata</i>	Ochnaceae	Toothache	Bark	Cousins and Huffman, 2002
43.	<i>Ficus insipida</i> Willd. (Oje)	Moraceae	Toothache	Latex	Gupta, 2006	55.	<i>Mangifera indica</i> L. (Mango)	Anacardiaceae	Sore gum	Whole plant	Kayode and Omotoynibio, 2009
44.	<i>Ficus bengalensis</i> L. (Indian fig)	Moraceae	Toothache	Plant juice	Ahmad et al., 2009	56.	<i>Micromeria biflora</i> Benth. (English lavender)	Labiate	Toothache	Root	Ahmad et al., 2009
45.	<i>Flacouria flavaescens</i> Wild. (Niger plum)	Flacourtiaceae	Toothache	Root	Agbovie et al., 2002	57.	<i>Milicia excelsa</i> (Welw.) C.C. Berg (African-teak)	Moraceae	Toothache	Bark	Agbovie et al., 2002
46.	<i>Garcinia kola</i> Heckel. (Bitter kola)	Guttiferae	To clean teeth	Root	Agbovie et al., 2002	58.	<i>Musanga cecropioides</i> R. Br. (Umbrella tree)	Cecropiaceae	Toothache	Bark	Zapfack, 2001
47.	<i>Jasminum arborescens</i> Roxb. (Chameli)	Oleaceae	Mouth rashes	Leaves	Shekhawat and Batra, 2006	59.	<i>Myrothamnus usuifolius</i> Wblw. (Resurrection bush)	Myrsinaceae	Gum inflammation	Leaves	Damme, 1922
48.	<i>Jasminum officinale</i> L. (Jasmine)	Oleaceae	Mouth rashes	Flower	Siddamalla yya, 2010	60.	<i>Nicotiana tabacum</i> L. (Tobacco)	Solanaceae	Toothache	Leaves	Agbovie et al., 2002
						61.	<i>Ocimum sanctum</i> Linn. (Tulsi)	Lamiaceae	Mouth sores	Leaves	Shekhawat and Batra, 2006

62.	<i>Olax subscorpoi dea</i> Oliv. (Akan-Brong)	Olacaceae	Toothache	Whole plant	Kayode and Omotoyinbo, 2009		(Tooth brush tree)			Al-Zeid, 2004; Almask et al., 2005;	
63.	<i>Olea ferruginea</i> Royle (Wild Olive)	Oleaceae	Toothache	Fruits	Ahmad, 2007	74.	<i>Salvia campanulata</i> Wall. (Kokai)	Lamiaceae	Toothache	Whole plant	Almas 2001
64.	<i>Origanum vulgare</i> L. (Oregano)	Labiateae	Toothache	Whole plant oil	Indiana Medical History Museum, 2010	75.	<i>Salvia officinalis</i> L. (Sage)	Lamiaceae	Sore gums	Whole plant	Approaches towards Evaluation of Medicinal Plants prior to Clinical Trials, 2006
65.	<i>Orthanthera albida</i> Schinz. (Ana tree)	Asclepiadaceae	To clean teeth	Stem	Damme, 1922	76.	<i>Sanguinaria canadensis</i> L.	Papaveraceae	Toothache	Whole plant	Indiana Medical History Museum, 2010
66.	<i>Palisota hirsute</i> (Thunb.) K. Schum. (Akan-Asante)	Commelinaceae	Toothache	Stem, leaves	Cousins and Huffman, 2002	77.	<i>Scoparia dulcis</i> Linn. (Sarkaraive mbu)	Scrophulariaceae	Toothache	Leaves	Vogel et al., 1978
67.	<i>Parinari curatellifolia</i> a Planch. Ex Benth (Cork tree)	Chrysobalanaceae	Toothache	Bark	Mabogo, 1990	78.	<i>Solanum incanum</i> L.	Solanaceae	Toothache	Root	Ganesan, 2008
68.	<i>Phylla dulcis</i> (Trev.) Mold (Aztec Sweet Herb)	Verbenaceae	Tooth decay	Leaves	Indiana Medical History Museum, 2010	79.	<i>Solanum panduriforme</i>	Solanaceae	Toothache	Roots	Sikdar and Dutt, 2008; Ahmad, 2007
69.	<i>Polyalthia suaveolens</i> Engl. & Diels (Annickia)	Annonaceae	Toothache	Fruits, roots and leaves	Cousins and Huffman, 2002	80.	<i>Spathodias campanulata</i> Pal.	Bignonaceae	Toothache	Bark	Hutchings, 1996
70.	<i>Punica granatum</i> Linn. (Anar)	Punicaceae	Mouth sores	Fruit covers	Shekhawat and Batra, 2006	81.	<i>Spilanthes americana</i> Hieron (Botoncillo)	Asteraeae	Toothache	Whole plant	Agbovie et al., 2002
71.	<i>Ricinus communis</i> L. (Castor bean)	Euphorbiaceae	Toothache	Seeds	Damme, 1922	82.	<i>Syzygium aromaticum</i> (L.) Merr.	Myrtaceae	Toothache	Whole plant	Gupta, 2006
72.	<i>Saccharum officinarum</i> L. (Sugar cane)	Gramineae	Strengthens the teeth.	Whole plant	Ahmad et al., 2009		(Clove)			Barnes 2007; Approaches towards Evaluation of Medicinal Plants prior	
73.	<i>Salvadora Persica</i> L.	Salvadoraceae	Tooth decay	Whole plant	Ismail et al., 2010; Almas and						

					to Clinical Trials, 2006
83.	<i>Vitis vinifera</i> L. (Grape vine)	Vitaceae	To clean teeth	Plant ash	Indiana Medical History Museum, 2010
84.	<i>Xanthium spinosum</i> L. (Amor seco)	Asteraceae	Toothache	Fruits, leaves, roots	Gupta, 2006
85.	<i>Zanthoxylum alatum</i> D.C. (Timur)	Rutaceae	To clean teeth	Twigs	Mahmood et al., 2005
86.	<i>Zanthoxylum zanthoxyloides</i> (Lam.) Zeprm. (Candlewood Tree)	Rutaceae	Toothache	Whole plant	Kayode and Omotoynib o, 2009
87.	<i>Ziziphus mauritiana</i> Lam. (Ber)	Rhamnaceae	Dental carries	Root	Shekhawat and Batra, 2006

3. Conclusion

Plants contain photochemical such as alkaloids, tannins, essential oils and flavonoids which have pronounced antimicrobial activity. This underlies the use since antiquity of herbs to improve oral hygiene and prevent tooth decay, gum disease and periodontitis. The miswak or chewing stick is an underestimated tool for dental hygiene which is only beginning to be explored in controlled clinical studies. So this review helps the researcher to explode these medicinal plants for more research in the field of dental science.
