4-Ehsan Zandi Esfahan, Assistant Professor, Rangeland Research Division, Research Institute of Forests and Rangelands, Agricultural Research, Education and Extension Organization (AREEO), Tehran, Iran

5-Majid Ghorbani, M.Sc. Graduate, Faculty of Natural Resources and Earth Sciences, University of Kashan

Book Title: Reclamation of Arid Lands

eBook ISBN: 978-3-319-54828-9

Number of Pages: 500

Publisher: Springer International Publishing

Copyright: 2017

Benefits:

- Includes valuable information about arid and semiarid regions both for specialists and non-experts alike
- Supplies simple methods of arid land reclamation that are based on indigenous knowledge
- Furthers our understanding of desert reclamation using examples from the Middle East

About this book:

This book provides an overview of arid and semi-arid lands conditions, their general characteristics, and methods of management, conservation, exploitation, and reclamation. It also focuses on how to utilize the potential of arid lands with the minimum manipulation and alteration. Arid and semi-arid areas represent a major part of natural ecosystems not only in Iran, but around the world, and mismanagement and inappropriate exploitation of these areas may lead to further gradual degradation. As such, an understanding of the characteristics of these areas is vital if they are to be conserved and reclaimed.
