

## Table of Contents

<b>Title</b>	<b>Page No.</b>
<b>An Agglomerate Model for Evaluating the Electrochemical and Hydrodynamic Characteristics of a Proton Exchange Membrane Fuel Cell</b> Pouya Barnoon; Davood Toghraie; Babak Mehmandosut; Mohammad Ali Fazilati; S. Ali Eftekhari	<b>5</b>
<b>CFD simulation of hydrothermal of a nanofluid in a microchannel subjected to a magnetic field</b> Mohammad Reza Assari; Arman Mohammadian; Alireza Jafar Gholibeik	<b>13</b>
<b>An experimental model for predicting normal solar performance chimneys concerning the percentage of openings</b> Sajede Nazari; Malihe Taghipour; Aliakbar Heidari	<b>21</b>
<b>Convergence of Legendre and Chebyshev multiwavelets in Petrov-Galerkin method for solving Fredholm integro-differential equations of high orders</b> Saeed Akhavan	<b>33</b>
<b>Investigation of modern ceramics in bioelectrical engineering with proper thermal and mechanical properties</b> Sharif Heydari; Ali Attaeyan; Pegah Bitaraf; Amir Mohammad Gholami; Bahareh Kamyab Moghadas	<b>43</b>
<b>Feasibility study of mechanical properties of alginates for neuroscience application using finite element method</b> Maryam Karimianmanesh; Elham Azizifard; Naghmeh Javidanbashiz; Mehran Latifi; Atefeh Ghorbani; Sheyda Shahriari	<b>53</b>
