

Table of Contents

Title	Page No.
Frequency responses analysis of clamped-free sandwich beams with porous FG face sheets Mohsen Rahmani	5
Comparison between continuous sensitivity analysis and Taguchi method in optimization of electromechanical devices Mohammadali Tavakkoli	19
Self-tuning consensus on directed graph in the case of time-varying nonhomogeneous input gains Mozhgan Bagherboum	27
Evaluation of the use of robotic surgery with remote simulation for use in the field of Medical Tourism and Pro-Tourism development Esmaeil Khaksarshahmirzadi; Tulen Saner; Ali Attaeyan; Somayeh Abdollahi; Molood Mohammadi; Sharif Heydari	47
Stabilized crack-opening stresses as a function of R-ratios and stress levels Rahi Chermahini; Majid Jabbari	61
Specifying the allowed remained bottom thickness after milling in CNG steel cylinders by FEM analysis and experimentation Mojtaba Esmailian; Mohsen Shahmoradi; Kamran Karimzadeh	67
