

Table of Contents

Title	Page No.
A new method for determination of natural frequency in bending vibration mode of single-walled carbon nanotubes Alireza Fatahi-Vajari	5
Design of a fuzzy adaptive controller for a ducted fan (UAV) Meysam Rahimi	19
Using finite element model in calculation of stress concentration factor around an elliptical hole in composite hybrid lamina Pedram Lorzadeh	27
The dynamic response of aircraft landing gear at the moment of landing with regard to smart fluid dampers content MR Nima Tabari; Saeed Mahdiyeh Borojeni	35
Analysis of airflow on an airfoil using electro-hydrodynamic actuators Mohammad Bigdeli; Alireza Ansari; Gholamreza Tathiri; Vahid Monfared	43
Fracture analysis of multiple axisymmetric interfacial cracks in an FGM Coated orthotropic layer Behrooz Momeni	55
