

Table of Contents

Title	Page No.
Low cycle fatigue prediction for cylinder head considering notch stress-strain correction proposed by Neuber Hojjat ashouri	5
A quick method for electrical energy system load shedding based on equivalent areas Shahrokh Shojaeian; Hamed Soltani	17
Investigating the performance of hydroponic green fodder and simplified heat transfer model of nanofarm for agricultural engineering application Amireza Esmaeili; Hamidreza Bahrami; Rozita Hajian; Mohsen Karimian; Ehsan Shokrani	27
Road detection by image processing, using neural network Ahmad Keshavarzi; Mehdi Keshavarz; Alireza Moradi	39
Secondary frequency control for improved dynamic performance in interconnected power system Farhad Mesrinejad; Somaye Yaghoubi; Bahador Fani	47
Static analysis of guyed tower regarding cable sagging by using finite difference model Kaveh Kumarci; Alireza Baharizadeh	55
